Open-Source Intelligence

Provided by: Northeast Counterdrug Training Center

This course is designed for criminal intelligence analysts, special agents, and other investigators. Students with any level of familiarity with the Internet and computers, from beginning to advanced, will find this course beneficial.

The program gives students an up-to-date understanding of how social networking sites work and how members act and interact. Student will learn what information is available on various sites and how to integrate that information into criminal investigations and criminal intelligence analysis.

Too often, investigators and analysts overlook or underutilize these valuable resources. Social networking sites are virtual communities. As in any large community, criminal organizations, fraud, violet crime, and victimization exist. Investigators need to understand these communities along with the tools, tricks, and techniques to prevent, track, and solve crimes.
